

Curriculum vitae

ir. Jeroen van Engelshoven
Belgenhoek 18, 5985 NJ Grashoek, NL
Tel: +31 6 202 600 74
e-mail: jeroen.van.engelshoven@engelsehoeve.nl
Birth date: August 10 1961; married, no children

Skills:	integral project management, product & (pre-) development, program management.
Affinity:	software development, marketing, new business development.

2011 - 2012 Program Execution Manager – FEI Electron Optics

Responsible for: Development of market specific electron microscopes.
Delivered: Program and project definition for an - electronics industry - specific version of the FEI High-end Titan electron microscope, in alignment with various stakeholders: marketing, service and manufacturing.

2010 - 2011 Project manager development – NTS Mechatronics

Responsible for: Development & production startup of mechatronic modules.
Delivered: pre-development of a large gantry for X-ray generators around an MRI scanner, production setup of high precision sample holders for electron microscopes, prototyping equipment for solar wafer efficiency improvement.

2006 - 2010 Project manager development – Philips Healthcare

Responsible for: Development & release of medical X-ray devices, with a high degree of software & hardware integration.
Delivered: Various projects on: Patient table, user Interface computer, LCD, display mounting, integration of various hospital X-ray Lab patient software modules.

----- Employer 1987 – 2006: Philips Display Components -----

2004 - 2006 Program manager Development

Responsible for & delivered: Development program definition: product, cost down & technology roadmaps. Continuous alignment with marketing/sales and (European & China) factories. Software projects on: international project info sharing & multi project (cost-down) progress reporting.

2002 - 2004 Integral project leader: 29” Real Flat tubes

Responsible for: Definition, development and introduction of 29”RF into the Dreux (F) factory and European market, in a 8 M€ project.
Delivered: Project definition (including a paradigm shift from original boundary conditions [both technically and in marketing]). Timely introduction of new product into the market. Product turnover has topped at about 200 M€/yr.

- 1998 - 2001** **Development project leader: WS Real Flat tubes**
- Responsible for: Type development of first and second generation of Wide Screen Real Flat tubes, for both 28"WS and 32"WS for the Aachen (G) factory, including design-in at customers.
- Delivered: Timely introduction of the first and second generation, leading a 30 people technical project team in a 4 M€ project. At peak the products generated a turnover of about 250 M€/yr.
- 1993 - 1998** **Development project leader: computer monitor tubes.**
Including an international (Taiwan - Austria - Netherlands) tolerance reduction project.
- 1991 - 1992** **Pre-development project leader: HDTV tube.**
- 1987 - 1991** **Technical specialist: particle optics & technical software.**
-

Languages: English, Dutch fluent in speaking and writing/reading.
 German fluent in speaking, reading.
 French understanding in speaking.

Recent courses: 2008 FDA rules & guidelines on medical devices
 2006 6 σ Green Belt
 2005 FAME (Financials for non-financial managers)
 2003 BBE (=Building on Business Experience)
 2002 Integral project management

Location: Eindhoven area, with regular international traveling

Private:

horses

 (incl. business case)

theoretical physics
 (gravity)

Education:

1980 - 1987 Physics, Technical University Eindhoven (Holland)
 Masters work: computer simulation of colliding particles.

1979 - 1980 High School in Fort Collins (Colorado, USA):
 Foreign Exchange Student Program

- 1979 High school in Tilburg (Holland): VWO-B
